

LIAM COLIN

FOUNDER OF SUNRISE STUDIO
MUSICIAN, COMPOSER & SOUND
ENGINEER

*"I wanted to create a unique
place in Koh Samui
for all artists."*

Trained from the age of 9 at the conservatory, Liam obtained state diplomas in guitar, piano, double bass as well as validations of achievements in orchestration, arrangement, notation and composition. Already passionate about sound, he took courses on the physics of sound, psycho-acoustics and mixing methods.

From 2003, he is alternately music teacher while developing his concert and sound activities (studio and live) in France and in Europe, which will become his full-time jobs from 2008 to 2022.

It is during these last years that Liam gives more and more importance and scale to his mixing activity. He composes custom music for artists, produces their album, participates in arrangements if necessary, mixes on demand for the TV (sound design) or singles.

In 2022, Liam realizes his dream by creating his custom recording studio from scratch in Koh Samui. He gets help for the acoustic design from a genius acoustician and sound engineer Pierre Jacquot.

Liam welcomes musicians and music producers (Chinese man – Matteo, Jarl Flamar, Megan Joelle Leach,...) from all over the world for his residential studio concept. His knowledge as a musician allows him to better understand what the artist expects, to have the same language and to be able to assist him as well as possible in fundamental steps which are the choices of sound, arrangements, etc.
